Forecast for Tuesday 25 Jan 2022

Weather: Patchy rain or summit snow continues in the northern ranges through the morning, whilst drier conditions remain in the south. A band of more persistent, mainly light rain or snow on the summits will moves southeast across the area from early afternoon, giving 3-4 hours of light rainfall. Occasional hill fog above 500 m for much of the day, especially in the north.

Chance of cloud free mountain/hill tops above 800m: 20%.

Visibility: Poor in extensive hill fog with cloud down to 500 m, occasionally 300 m. Good elsewhere, lowering to moderate through the afternoon in rainfall.

Met Office Aberdeen Meteorologist's View
Expect a notable wind chill through the afternoon with a combination of stronger winds and damp conditions.

Forecast for Wednesday 26 Jan 2022
Weather: A dry but breezy morning with strong west to southwest winds on the summits, and occasional hill fog above 500 m. A band of heavy rain will cross the Southwest Highlands through the afternoon and evening, bringing hill fog above 400 m and west to southwest gale force winds.

Maximum wind: Southwesterly becoming westerly 35-45 mph gusting 50-60 mph (afternoon and evening).

Chance of cloud free mountain/hill tops above 800m: 50% in the morning, becoming 10% or less in the afternoon.

Visibility: Poor in occasional hill fog down to 400-500 m. Otherwise good lowering to moderate in rain in the afternoon.

Temperature: **Glens:** Plus 5 rising to plus 8 Celsius.
At 800m: Zero rising to plus 3 Celsius.
Freezing level: 1100 m rising above summits through the afternoon, lowering 1100 m by midnight.
